DATA ON RESTORATION OF AGRICULTURAL PRODUCTION IN CHINA

[Comment: The statistics presented below were compiled by the editors of the 1952 edition of the Jen-min Shou-ts'e from an article, "Great Achievements in Agricultural Production During the Last Two Years" by Liang Cheng-chieh published in the February 1952 issue of Ta-chung Nung-yeh (Agriculture of the Masses) and from a proclamation of the Government Administration Council of the Central People's Government entitled "Decisions on Agricultural Production in 1952." Percentage figures for 1949, 1950, and 1951 are from the article by Liang. According to Liang, the 1951 figures are estimates. The estimate on aquatic products was incomplete while estimates for the 1949 hog production were unavailable. The 1952 percentages for food crops and cotton given by the Government Administration Council represent percentage increases over 1951 production. The highest records of production in the history of China are taken as 100 percent.]
